DC Varnish

DRUCK  CHEMIE

Print Liquids Technology

DC Varnish

DC DruckChemie is a leading supplier of speciality chemistries, consumer goods and services for the printing and graphics industry.

With more than 40 years of experience in commercial and package printing we introduced our Know-How in our DC Varnish-series offering our clients embellishment varnishes for different applications.

Benefit from our top-quality products and your printings are embellished.

There are high requirements, especially with modern package printing, not only with reference to optic but also to application security.

All our developments are especially adjusted to the respective requirements. In our product portfolio we

also have dispersion varnishes and UV-varnishes - convenient for direct contact with filling material. This has been certified by a renowned laboratory. Therefore our varnish products are officially admitted for this application range.

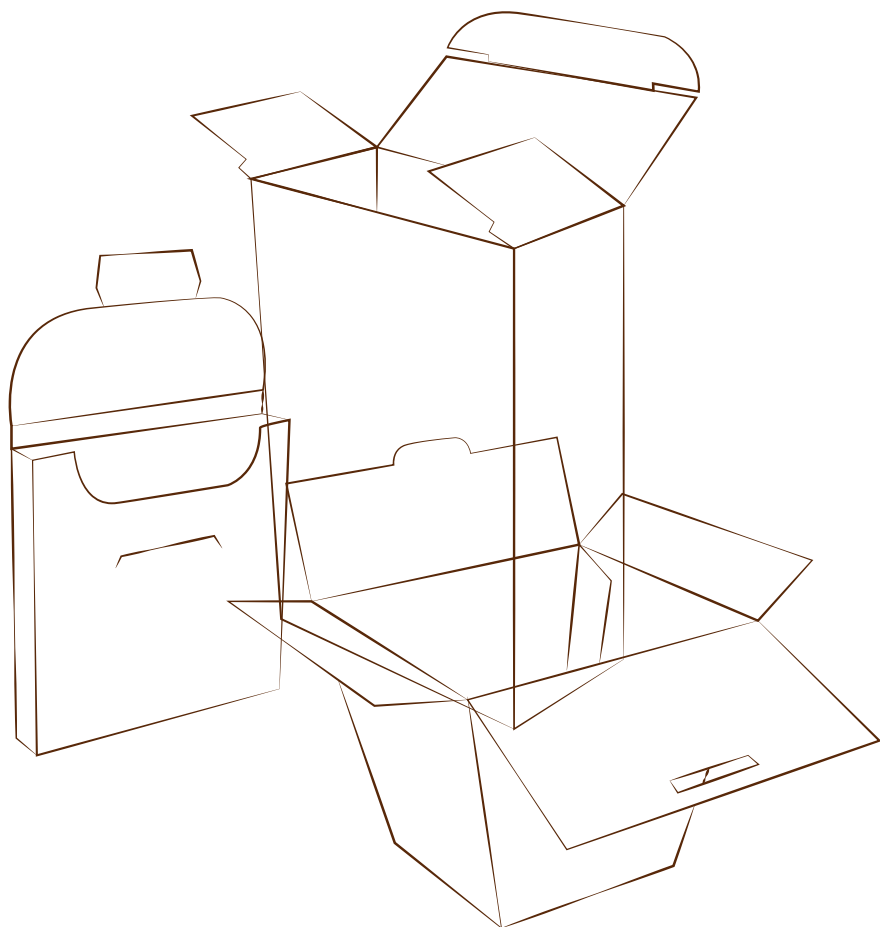

DC Varnish series is characterized by abrasion resistance. All varnishes have a very good distribution, high reflectiveness and are free from odor.

Qualities, developed by us for the packaging field are highly convenient to further embellishment such as foil stamping.

They can be used with all popular chambered doctor plate and roller-type-coaters.

For wet - in - wet application and wet on dry treatment.

We are always ready to meet your individual embellishment desires!

Matched System.

Thoroughly thought-out solutions can guarantee a smooth printing process. For this reason we also offer a range of "matched" consumables such as

- Coating plates
- Coating blankets
- Coating Remover
Space Acryl 1030 Lackentferner
- Anti set-off powder
Eurosil Ideal and Gold KSL-S5 WL

Our DC Serviceteam is always at your disposal and would be happy to arrange a varnish audit and recommend a

suitable varnish-system. Our service does not end there. We not only deliver the necessary products but can also dispose of associated waste.

As a certified waste-disposal organization we take care of collection and disposal of varnish waste. All this happens by request of our DC serviceteam.

Please take advantage of our full-service program!
