

Offset blankets

A stable and high quality printing process is dependent on many parameters. One decisive factor is the selection of the proper offset blanket. DruckChemie offers a wide choice of offset blankets, which are especially matched to the specific area of application.

We are also very flexible and can handle special customer demands quickly and without complication thanks to our in-house order-picking facilities. Comprehensive testing and control procedures in our in-house laboratory guarantee the consistent high quality of our offset blankets.

Our customers achieve several advantages by using DruckChemie offset blankets:-

- High-definition, sharp dot reproduction
- Minimal dot gain
- Excellent large format printing
- Resistant to mechanical and chemical influences
- Format edging insensitivity
- Very good paper release ('Quick Release' effect)
- High resistance to crumpling
- Long service life
