

DruckChemie Ultra Sonic 1.0

A highly active ultra sonic cleaner which rapidly and thoroughly removes even stubborn dirt from anilox rolls and mechanical parts.

Advantages:

This special cleaner thoroughly removes the dirt which other cleaners do not. In most cases prewash or subsequent cleaning is not necessary.

Simple Application:

DruckChemie Ultra Sonic 1.0 is very easy to handle and use because of its special product characteristics.

Suitable for use in ultra cleaning bath:

The cleaning power can be enhanced with ultrasonic devices.

Many of the traditional washing agents no longer fulfil the demands of today's machinery with their highly developed print applications and configurations. DC DruckChemie, through continuous in-house laboratory testing, can guarantee the flexibility required of its washing agents to meet the ever-changing printing characteristics. Our washing agents have good dissolving power and contain constituents to protect customers' machinery. All DC DruckChemie formulations for the cleaning and care of rubber blankets and rollers have been subjected to extensive testing and trial phases.
