The source of print quality

About us

DC DruckChemie, a wholly owned subsidiary of Langley Holdings plc, is part of the group's Print Technologies Division. We manufacture and supply specialty chemicals, consumables and support services for the printing and graphics industries.

With operations in nine European countries and Brazil, we serve over 6,000 customers with more than 4,000 certified products. Since 2020, we've expanded our capabilities through the acquisitions of BluePrint and HiTech Chemicals (2020), PCO Europe (2023) and WS Print (2025).

We help printers optimise processes, reduce material usage and meet sustainability goals. As a certified waste disposal organisation, we also manage the safe recycling and disposal of used chemicals and consumables, working closely with leading press manufacturers to ensure quality and environmental responsibility.

- **A complete range of products and services**, continuously optimised for customer needs
- **Certified waste disposal organisation** – DruckChemie assumes responsibility for professional recycling and can dispose of products and chemicals after use
- **Vast industry knowledge** invested into ever more efficient, environmentally compatible products and services

Products

As a leading innovator, manufacturer and supplier of high-quality products, it is our vision to make products accessible to the entire graphics industry in order to enable the production of high-quality print.

■ Sheetfed Washing Agents

Tailored for sheetfed printing, these washing agents maintain optimal machinery performance. Regular lab testing ensures they meet the demands of modern print configurations and high-quality applications.

■ Heatset Washing Agents

Specifically designed and tested for heatset printing, these washing agents maintain both efficiency and quality.

■ Coldset Washing Agents

Developed for coldset printing needs, these washing agents ensure reliable operation and compatibility with evolving machinery and configurations.

■ Sheetfed Fount Solutions

Enhancing alcohol-free printing, these fount solutions integrate seamlessly with modern inks, plates, and presses to achieve outstanding results on sheetfed equipment.

■ Heatset Fount Solutions

Optimised for heatset printing, our fount solutions enable smooth operation with fast, high-performance machinery and alcohol-free processes.

■ Coldset Fount Solutions

Designed for coldset printing, these solutions align with alcohol-free systems, ensuring reliable results with modern inks, plates and press types.

■ Silicone Emulsions

For high-speed commercial web presses, our silicone emulsions deliver exceptional print quality, ensuring superior results for both printers and customers.

■ Glue

Our adhesives are crafted for precision in the graphic industries and excel in binding and gluing applications for high-quality printed products.

■ Varnishes

We offer a versatile range of coatings to meet specific customer needs. As an eco-conscious partner, we provide certified disposal services for varnish rinse water.

■ Printing Aids

Our printing aids enhance print quality while boosting productivity by minimising downtime and maintaining consistent performance.

■ Special Cleaners

From ink solvents to dampening roller cleaners, our range addresses stubborn offset printing dirt with solutions for cleaning, protection and maintenance of printing rollers.

■ Anti-Set-Off Powders

Our powders prevent sheet adhesion and folding in delivery stacks, ensuring smooth downstream processes like laminating and varnishing.

■ Cleaning Cloths

Optimised for automatic blanket washers, our cleaning cloths are designed to minimise detergent use, accelerate printing and reduce downtime.

■ Offset Blankets

We offer an extensive range of offset blankets, meticulously matched to different printing applications for stable, high-quality results.

■ Flexographic Printing

Our full-service solutions for flexo printers include eco-friendly solvents and practical cleaning systems tailored to today's demanding print environments.

A responsible and sustainable way of working is embedded into our working culture and methods

Sustainability

DruckChemie's end-to-end recovery and recycling services are contributing to the preservation of the environment. In addition, the company is also committed to the development of ever more innovative waste management solutions.

DruckChemie devotes the same care and attention to printer waste and disposal issues as it does to application support when introducing its products. The DruckChemie disposal services provide assistance and detailed answers to an ever-increasing number of environment-related disposal questions, collating continuous feedback to determine ways that environmental performance can be improved still further.

- Consistent focus on safety and environmental protection
- Logistics concept for optimum-cost disposal that avoids trips without loads wherever possible
- Comprehensive information and consultation on waste-related matters
- Environmentally sound deposit system
- VOC-free fount solutions and washing agents

Research and Development

DruckChemie's ongoing commitment to a rigorous research & development programme has helped make it the main driving force for its industry.

In conjunction with FOGRA (German Graphic Technology Association) and the world's leading printing press manufacturers, DruckChemie research has helped take the manufacture and supply of consistently high quality chemicals and consumables to greater levels of excellence, with higher productivity, greater safety, less waste and significantly improved air quality, resulting in safer working environments.

A personalised and customer- centric delivery concept

Service Tour

Close, regular contact for complete customer support.

The DruckChemie Service Tour team, comprising a close-knit logistics network with over 80 service vehicles, can make regular visits to any customer for inventory management, on-site replenishment and advice on any aspect of materials or other requirements, saving time and money for customers while also helping to preserve the environment.

- Service Team driver collects residual and waste products and packaging for responsible disposal
- Specialist staff available on short notice with the ability to reach any print shop within hours
- Provision of accurate advice and full support for all technical matters as standard practice
- Deliveries directly to in-house storage facilities, to the press or to holding tanks, according to customer requirements
- Extensive geographical coverage

Waste Management

Waste disposal as a core service commitment.

As a certified waste disposal organisation, DruckChemie is able to reassure its customers that its transport vehicles and warehouse facilities are fully compliant with all legally prescribed industry directives. The company's high standards of safety, reliability and customer service are precisely reflected in its commitment to professional and appropriate waste disposal. DruckChemie devotes significant resources to the development and provision of optimal recycling concepts for highly specific waste disposal requirements.

- Provision of complete information and consultation on waste-related matters
- Trained hazardous goods drivers (ADR certified, German CCI trained)
- Collection directly from storage facilities or directly at the press
- Guaranteed strict separation of waste according to content and composition and recirculation into the resource chain wherever possible
- Packaging and markings in accordance with applicable regulations and standards
- Laundered print cloth service
